Dental implantology and implant prosthodontics have been his primary areas of clinical activity for many years. Prof. Wolfart's main areas of research, apart from implantology and implant prosthodontics, include dental esthetics, the clinical performance of new all-ceramic materials, and their associated improvement in quality of life.

In 2014 the Quintessence Publishing published his textbook "Implant Prosthodontics – A Patient-Oriented Concept". It is available in eight different languages. The 2nd edition was published in
